

# CANADELL

## CANADELL

FRANCE

1

Fred and Jacques Canadell in front of a French oak log destined for stave production.

With two stave mills in France and connections to France's most prestigious forests, Canadell uses strict proprietary toasting regimens to carefully craft a complete line of oak alternatives.

Canadell oversees the entire manufacturing process of its oak alternative products for full traceability, from selecting trees in the forest to seasoning, splitting, air drying, toasting and the final packaging of the product. Canadell is part of the PEFC (Programme for the Endorsement of Forest Certification) which is the world's largest forest certification system that promotes sustainable forest management and a proud sponsor of the "ONF - AGIR" fund (Office National des Forêts - React) which is committed to the preservation of France's forests to ensure their sustainability and help mitigate the negative impacts of climate change.

### STYLISTICALLY

*The Canadell product line includes powder and chips for use during fermentation and post ferment aging, to dominoes and staves, which best showcase the qualities of French oak and show characters remarkably similar to barrel aging. Canadell bridges the gap between barrels and oak alternatives.*

French oak tree in the Tronçais forest of France.

Oak chips

French oak dominoes

Barrel inserts through the bung

Fire toasted French oak staves

French oak staves

### STRONG POINTS

- Company historically is a merrandier, ensuring control of its oak alternative product line from the source: the oak tree
- Complete in house integration from when oak is cut to packaging
- Family owned and operated
- Large selection of alternative products and toast levels
- Staves are evenly spaced and air dried outside in the elements for optimal ventilation and seasoning
- Fire toasted and convection toasted staves
- Chips • Dominoes
- Barrel and bung inserts
