# CLC: Concrete Tanks

Two door 20 HL CLC Diamonds at Domaine du Gringet in France's Savoie.

CLC Vasche, which stands for “**Cooperative Lavorazione Cementi**,” is a family-owned and run company located outside of Padova in North Eastern Italy. CLC is a leading manufacturer for standard and tailor made concrete tanks for wine production, whose tanks can be found throughout Italy, France, Spain, South Africa and other important winemaking countries throughout the world.

## MATERIAL

CLC concrete tanks are made of either **concrete, or reinforced concrete** depending on the shape and size of the tank. The production and mix of concrete is a consistent blended aggregate of **sand, marl, clay, stones and gravel sourced from the local Brenta river** which is fed from rivers that originate from melting glaciers high up in the neighboring Dolomite Mountains reaching into the Alps.

## HISTORY

CLC was **founded in 1955** by a group of Italian families that to this day run the company together. They specialize in the **production of standard, modular tanks but have also built their reputation by offering tailor made concrete tanks** that are customized to their customers’ cellars and needs.

## PRODUCTION

**A state of the art, computerized machine** is used to accurately and consistently mix the right amounts of all necessary aggregates, cement, and water in order to **guarantee a consistent and optimal mix of concrete across all tanks**. For small standard tanks, the concrete is poured inside of molds and allowed to cure. For larger tanks, rebar and reinforced steel is used to provide structural support to the tank.

14.5 HL Castel Aromy.

## POROSITY / WINEMAKING

If the interior of the concrete tanks are not lined with epoxy, application of **30% tartaric acid solution is needed to neutralize** the inside of the concrete tank before using for wine production therefore the porosity of the concrete varies over time, however concrete does allow wine to breathe. Due to it’s extremely stable thermal inertia characteristics, **concrete tanks are excellent vessels for fermentation**; but many producers also opt to age their wine in the vessels too.

### DIAMANTE AND AROMY STANDARD ACCESSORIES

\*Numbers corresponds to type of Diamante and Aromy\*

- Top manhole DN 500 mm and double action relief PVC valve [1,2,3]
- Top manhole DN 400 mm and double action relief PVC valve [4,5,6]
- Rectangular manway 315x420 mm with drip lip (horizontal opening) [2,3]
- 1/2" Sampling ball valve fixed on the horizontal frontal manway [1,2,3]
- 1/2" Sampling ball valve fixed on concrete [4,5,6]
- Oval manway 300 x 400 at tank bottom [2]
- Oval manway 300 x 400 at tank bottom and total discharge ball valve 2" Tri Clover ball valve, gasket, bolts and drain hole [4,5,6]
- Partial discharge racking 2" Tri Clover ball valve, gasket, bolts and drain hole [2,3,4,5,6]
- 49" x 60" x 11" stand [3]
- Total discharge ball valve 2" Tri Clover ball valve, bolts [2,3,4,5,6]
- 2x 10" tall concrete supports [1]
- 2x 20" tall concrete supports [2]
- Standard Grey Ral smooth wash concrete exterior [1,2,3,4,5,6]
- More accessories on pg. 11

## 2024 USA PRICES CLC Standard Tanks

*IMPORTANT: CLC takes great pride in making tailor made concrete wine tanks that can be customized depending on your winery. But for any tank taller than 89 inches, they will need to be loaded inside of the container horizontally which requires additional container unloading and tank installation services.*
